Education

National Institute of Technology, Agartala

2023 – 2028

Bachelor of Science and Master of Science in Mathematics and Computing

CGPA: 8.5

Saint Soldier Public School, Jaipur

2021 – 2022

Senior Secondary (XII)

Percentage: 90.8

Saint Soldier Public School, Jaipur

2019 – 2020

Secondary (X)

Percentage: 92.60

Technical Skills

- **Programming Languages:** Python, C
- **ML and DL Frameworks:** TensorFlow, Keras, Scikit-Learn, NumPy, Pandas, Matplotlib, Seaborn
- **Generative AI LLMs:** OpenAI API, Gemini API, Claude API, Hugging Face Transformers, LangChain, RAG, ChromaDB, Vector Embeddings, Prompt Engineering, Agentic Workflows, Multi-Agent Systems, QLoRA Fine-Tuning, Multimodal AI, Ollama.
- **Vector Database:** ChromaDB, Vector Embeddings
- **NLP:** Text Processing, BERT, Transformers, Whisper (ASR), LLMs
- **Data Databases:** SQL, CSV, JSON, Matplotlib, Seaborn
- **Software Engineering:** OOP, Data Structures Algorithms, REST APIs, Streamlit, Git
- **Mathematics:** Linear Algebra, Probability Statistics, Calculus, Data Mining Warehousing, Game Theory, Graph Theory, Soft Computing Linear Programming,

Projects

🐙 Gmail RAG System (Python, Gradio, Gmail API, ChromaDB, Hugging Face, Google Gemini API)

- Engineered an end-to-end RAG pipeline that authenticates via Gmail OAuth, fetches and parses all user emails as structured JSON, and chunks them for downstream embedding generation.
- Generated semantic embeddings using Hugging Face Transformers and indexed them into a ChromaDB vector database, enabling fast and accurate similarity-based retrieval.
- Integrated an LLM (OpenAI/Gemini) as a conversational interface that dynamically retrieves relevant email context from ChromaDB to answer natural language queries with high accuracy.
- Demonstrated practical command over the full RAG stack — OAuth authentication, data ingestion, vector search, and LLM orchestration — in a real-world personal data use case.
- Deployed as a Gradio chat interface with persistent chat history and transparent source display, supporting both historical email search and queries over newly fetched live emails.

🐙 Kindle Review System (Python, Scikit-Learn, Naive Bayes, Streamlit)

- A sentiment classification system (positive / negative) for Kindle product reviews using Naïve Bayes with data preprocessing to remove noise and improve accuracy.
- An interactive real-time Streamlit web app enabling live sentiment prediction from user-submitted review text.

🐙 Salary Prediction Project (Python, TensorFlow, Keras, Streamlit)

- Built and deployed a neural network to estimate customer salary from financial indicators including credit score, age, and account balance; delivered as a user-friendly Streamlit application.

🐙 Costumer Churn Prediction (Python, TensorFlow, Keras, Streamlit)

- Designed a deep learning model using TensorFlow and Keras to predict customer churn based on credit score, age, account balance, and behavioral metrics with end-to-end feature engineering.
- Deployed via a Streamlit web app for real-time churn inference, enabling instant predictions from user-provided customer data.

Experience and Contributions

President – Data Science AI Club, NIT Agartala

- Lead and coordinate data science initiatives, organizing workshops and knowledge-sharing sessions on machine learning, AI, and LLM topics for 100+ student members.
- Spearhead predictive modeling and data visualization projects using Python and SQL; contributed to open-source dashboards offering data-driven insights.
- Mentored junior members in ML concepts, feature engineering, and model evaluation; facilitated team participation in hackathons and AI research initiatives.

Design Lead – Data Science AI Club, NIT Agartala

- Directed all club design and branding efforts, creating promotional and educational material for events, workshops, and social outreach.

CORE COMPETENCIES

Problem Solving Analytical Thinking — Team Collaboration — Technical Writing Documentation —
Communication — UI/UX Design

CODING PROFILES ACHIEVEMENTS

LeetCode: 150+ problems solved **Focus:** Data Structures, Algorithms, Dynamic Programming, Graphs
